

FOSSIL FREE COVENTRY

As storms, floods and wildfires have been hitting the headlines and devastating the lives of people around the world recently, it's hard to imagine a world where the weather will become even more extreme. But this is the reality of the moment we're living through.

As we launch **Fossil Free Coventry** we stand together to say: **Enough. No more stalling, it's time for action.**

Join the fossil free movement now and take action for a safe and just future.

To stop catastrophic climate change we have to keep fossil fuels in the ground and quickly have a fair and just transition towards a clean renewable economy.

What are we asking for?

West Midlands Pension Fund (WMPF) to stop investing in oil, coal and gas and reinvest this money into clean energy, local infrastructure or fossil free investments.

Coventry City Council to back this call by passing a motion calling on WMPF to **divest** from fossil fuels.

Coventry City Council and **Coventry businesses** to take all possible steps to reduce carbon footprints.

What can you do to help make it happen?

- ✓ Write to your local councillor
- ✓ Sign our petition
- ✓ Come along to our next meeting
- ✓ Spread the word
